Please note our comments about the following statement:

"AOL Time Warner, through its subsidiary, Netscape Communications Corporation, filed suit Tuesday against Microsoft for alleged anticompetitive conduct regarding its browser, charging that Microsoft's Internet Explorer illegally harmed Netscape's Navigator browser."

Our comment on this matter: I have been running Microsoft Windows for years and using Netscape as my browser not Explorer. I find this new suit completely frivolous against Microsoft. I chose to use Netscape as my browser since I first started using the internet a number of years ago. I am sure, millions of other people are doing the same. It is not as though one does not have a choice what they want to use as their browser. Hopefully the courts will see this for what it is, harassment towards a company that has cause NO HARM against them or anyone. Please put a stop to this by seeing there is no case here for AOL Time Warner and see it for what it is.

We thank you for stopping this at this point for the good of the public and for Microsoft.
